DAY 7 - TRAIL SUMMARY

Distance	6.3 mi
Gain	4,050'
Loss	4,050'
Start Elev.	9,851'
End Elev.	9,851'
High Point	12,441'
Difficulty	Hard
Hiking Time	4h 12m

Program
Black Horse Mine; Baldy Mountain;
Baldy Mining District Program...

ELEVATION PROFILE

GEOLOGY

The layover at Baldy Town provides an opportunity to observe the high-country geology directly. This area is part of the core of the Cimarron Range, where crystalline rocks such as amphibolite, hornblende schist, and pink to reddish pegmatite are common. Quartz-monzonite porphyry dikes and other intrusive bodies cut the high ground and help form the rugged ridges and sharp landforms.

DAILY RIDDLE

Riddle: I'm tall when young and short when old. I provide light in the dark. The wind is my enemy. What am I?
Answer: A candle

LOOK FOR THIS TODAY

High-elevation Baldy Mountain day Mining ruins, historic Baldy Town, and summit vistas Broad alpine meadows and rock outcrops

ASTRONOMY

Night: pre-dawn moonrise (moonrise ~3:50 am local) Moon phase: Waning gibbous (~82.4% illumination)
Targets: Milky Way center transits earlier; planets visible near dusk (Venus/Jupiter low after sunset)
Notes: Dark hours before moonrise are best for deep-sky observing
