ELEVATION PROFILE

GEOLOGY

The Indian Writings segment approaches Hart Peak and the archaeological area. Local outcrops are likely to include more resistant sandstones and shales, with visible cliffs and rock faces that preserve cultural markings. This day is a good example of the boundary between the Cimarron Range's higher structural terrain and the lower sedimentary foothills.

? DAILY RIDDLE

Riddle: What is seen in the middle of March and April that can't be seen at the beginning or end of either month?
