|-------------|----------|
| Distance    | 4.1 mi   |
| Gain        | 1,630'   |
| Loss        | 710'     |
| Start Elev. | 6,500'   |
| End Elev.   | 7,550'   |
| High Point  | 7,550'   |
| Difficulty  | Moderate |
| Hiking Time | 2h 44m   |

Program  
Ranger Training; Dry Camp (Water @ Harlan)

## ELEVATION PROFILE

## GEOLOGY

The route starts at Turkey Creek Trailhead and climbs into the lower pined ridge country. As you move westward, the shale foothills steepen and begin to approach the more resistant structural features of the range. Harlan at 7,550 ft lies near the lower flank of the Cimarron Range, where east-dipping Cretaceous strata are succeeded by the first signs of intrusive dike influence.

## DAILY RIDDLE

Riddle: I'm always coming but never arrive. Hikers dread me in summer, but I'm essential in winter. What am I?  
Answer: Tomorrow

## LOOK FOR THIS TODAY

Bus drop at Turkey Creek Trailhead  
Climb from lower canyon country into pined ridgelines  
Arrival at Harlan Staff Camp at 7,550 ft  
Ranger training area and dry camp surroundings

## ASTRONOMY

Night: evening and night Moon phase: Full (Strawberry Moon) — crest ~23:57 UTC on Jun 29  
Targets: Full Moon rising near the Teapot (Sagittarius)  
Notes: Very bright moonlight; deep-sky observing not ideal this night
